Assignment #0

Date Due: Permanent, no due date, 2026

Total: 0 marks

Please, work on your VM as `sysp` user.

1. (Part I Unix commands) Take each command that appears in the slides and do the following:
   (a) Read the meaning of the command and it's common options.
   (b) Test the command on the VM
   (c) Use `man` to learn about other options not mentioned in the slides.
   (d) Test as many options as you can for each of these commands.
   (e) Try to combine the current command that you learn with previous commands using unnamed pipes, input and output redirection, assigning values to variables, and command substitution
   (f) Try to execute commands as another user without logging in/out of your account. Observe the difference in results and error messages.
   (g) Try to understand error messages and find a fix.
2. (Part II) Will be updated, so keep an eye on it.
